

AUS920010333US1

AMENDMENT

Please amend the above-identified application as follows:

In the Specification:

Please amend the specification in the section of Detailed Description of Exemplary Embodiments as follows:

Please replace line 3, on page 12 with the following amended line 3, on page 12:

software routines for storing (120) and retrieving (~~1288~~128, 138) travel records,

In the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application.

Please amend the claims as follows:

1. (Currently Amended) A method for facilitating international travel, the method comprising the steps of:
 - creating, in response to a signal communicated through an internet-enabled device coupled for data communications through at least one internet connection to an international travel server, a travel record to be stored within the international travel server;
 - creating, in dependence upon the travel record, an immigration admissions form for thea destination country; ~~and~~

AUS920010333US1

validating travel described in the travel record against admissions rules stored in
an admissions rules database; and
submitting the immigration admissions form to an immigration admission forms
database for the destination country.

2. (Original) The method of claim 1 wherein the internet-enabled device is a workstation in a kiosk at an airport.
3. (Original) The method of claim 1 wherein the internet-enabled device is a workstation installed in the back of a passenger chair in an airplane.
4. (Original) The method of claim 1 wherein the internet-enabled device is a personal computer.
5. (Original) The method of claim 1 wherein the internet-enabled device is a hand-held personal data administrator.
6. (Original) The method of claim 1 wherein the at least one internet connection is wireless.
7. (Original) The method of claim 1 wherein the travel record comprises travel data describing travel, the travel data including identification of a traveler and of a destination country.
8. (Original) The method of claim 1 wherein the international travel server is a software application installed and operating on one or more computers, the software application further comprising software routines storing and retrieving travel records, validating travel described in travel records against admissions rules stored in admissions rules databases, and submitting to immigration databases immigration admissions forms prepared in dependence upon the travel records.

AUS920010333US1

9. (Original) The method of claim 1 wherein creating in dependence upon the travel record, an immigration admissions form for the destination country, further comprises reading travel data from a travel record and inserting the read travel data into an immigration admissions form.
10. (Original) The method of claim 1 wherein submitting the immigration admissions form to an immigration admission forms database for the destination country further comprises communicating the forms as electronic data communications through at least one internet connection.
11. (Cancelled)
12. (Currently Amended) The method of claim ~~11~~ wherein validating the travel records further comprises comparing the travel described by travel data in the travel record to admissions rules governing the travel described by the travel data in the travel record and reporting to the traveler through the internet-enabled device a result of the comparison.
13. (Original) The method of claim 12 further comprising storing the result of the comparison in the travel record.
14. (Original) The method of claim 1 wherein the travel record comprises a travel record form, wherein the travel record form is dependent upon admissions rules.
15. (Currently Amended) A system for facilitating international travel, the system comprising:
 - means for creating, in response to a signal communicated through an internet-enabled device coupled for data communications through at least one internet connection to an international travel server, a travel record to be stored within the international travel server;

AUS920010333US1

means for creating in dependence upon the travel record, an immigration admissions form for the destination country; and
means for validating travel described in the travel record against admissions rules stored in an admissions rules database; and
means for submitting the immigration admissions form to an immigration admission forms database for ~~the~~ destination country.

16. (Original) The system of claim 15 wherein the internet-enabled device is a workstation in a kiosk at an airport.
17. (Original) The system of claim 15 wherein the internet-enabled device is a workstation installed in the back of a passenger chair in an airplane.
18. (Original) The system of claim 15 wherein the internet-enabled device is a personal computer.
19. (Original) The system of claim 15 wherein the internet-enabled device is a hand-held personal data administrator.
20. (Original) The system of claim 15 wherein the at least one internet connection is wireless.
21. (Original) The system of claim 15 wherein the travel record comprises travel data describing travel, the travel data including identification of a traveler and of a destination country.

AUS920010333US1

22. (Original) The system of claim 15 wherein the international travel server is a software application installed and operating on one or more computers, the software application further comprising software routines storing and retrieving travel records, validating travel described in travel records against admissions rules stored in admissions rules databases, and submitting to immigration databascs immigration admissions forms prepared in dependence upon the travel records.
23. (Original) The system of claim 15 wherein means for creating in dependence upon the travel record an immigration admissions form for the destination country, further comprises means for reading travel data from a travel record and means for inserting the read travel data into an immigration admissions form.
24. (Original) The system of claim 15 wherein means for submitting the immigration admissions form to an immigration admission forms database for the destination country further comprises means for communicating the forms as electronic data communications through at least one internet connection.
25. (Cancelled)
26. (Currently Amended) The system of claim ~~25~~15 wherein means for validating the travel records further comprises means for comparing the travel described by travel data in the travel record to admissions rules governing the travel described by the travel data in the travel record and means for reporting to the traveler through the internet-enabled device a result of the comparison.
27. (Original) The system of claim 26 further comprising means for storing the result of the comparison in the travel record.
28. (Original) The system of claim 15 wherein the travel record comprises a travel record form, wherein the travel record form is dependent upon admissions rules.

AUS920010333US1

29. (Currently Amended) A computer program product for facilitating international travel, ~~the method-computer program product~~ comprising:
- a recording medium;
 - means, recorded on the recording medium, for creating, in response to a signal communicated through an internet-enabled device coupled for data communications through at least one internet connection to an international travel server, a travel record to be stored within the international travel server;
 - means, recorded on the recording medium, for creating in dependence upon the travel record, an immigration admissions form for ~~thea~~ destination country; and
 - means, recorded on the recording medium, for validating travel described in the travel record against admissions rules stored in an admissions rules database; and
 - means, recorded on the recording medium, for submitting the immigration admissions form to an immigration admission forms database for the destination country.
30. (Original) The product of claim 29 wherein the internet-enabled device is a workstation in a kiosk at an airport.
31. (Original) The product of claim 29 wherein the internet-enabled device is a workstation installed in the back of a passenger chair in an airplane.
32. (Original) The product of claim 29 wherein the internet-enabled device is a personal computer.
33. (Original) The product of claim 29 wherein the internet-enabled device is a hand-held personal data administrator.
34. (Original) The product of claim 29 wherein the at least one internet connection is

AUS920010333US1

wireless.

35. (Original) The product of claim 29 wherein the travel record comprises travel data describing travel, the travel data including identification of a traveler and of a destination country.
36. (Original) The product of claim 29 wherein the international travel server is a software application installed and operating on one or more computers, the software application further comprising software routines storing and retrieving travel records, validating travel described in travel records against admissions rules stored in admissions rules databases, and submitting to immigration databases immigration admissions forms prepared in dependence upon the travel records.
37. (Original) The product of claim 29 wherein means, recorded on the recording medium, for creating in dependence upon the travel record, an immigration admissions form for the destination country, further comprises means for reading travel data from a travel record and means for inserting the read travel data into an immigration admissions form.
38. (Original) The product of claim 29 wherein means, recorded on the recording medium, for submitting the immigration admissions form to an immigration admission forms database for the destination country further comprises means for communicating the forms as electronic data communications through at least one internet connection.
39. (Cancelled)
40. (Original) The product of claim ~~39~~29 wherein means, recorded on the recording medium, for validating the travel records further comprises means for comparing the travel described by travel data in the travel record to admissions rules governing the travel described by the travel data in the travel record and means for reporting to the

AUS920010333US1

traveler through the internet-enabled device a result of the comparison.

41. (Original) The product of claim 40 further comprising means, recorded on the recording medium, for storing the result of the comparison in the travel record.
42. (Original) The product of claim 29 wherein the travel record comprises a travel record form, wherein the travel record form is dependent upon admissions rules.
